10	7:2	7:2	7:3	7:3	5:3	5:4	5:4	4:4

POINT SPLITS

Point Splits occur when a lower-skill player loses the match but wins half the necessary number of racks (round up).

Point splits are always 7/3, with 7 points going to the winning player and 3 points going to the losing player.

A match between two players of equal skill never results in a point split.
